CHRIS J. JOHANNSEN

THE FARMER WHO PROTECTS HIS LAND IS TRULY A PUBLIC SERVANT AND WILL LEAVE MORE FOR POSTERITY THAN HE TAKES FOR HIMSELF.

The Grundy County Soil & Water Conservation District advocates good conservation practices that will protect the land, provide for a better posterity, enhance the environment and result in a better place to live, work and play.

Practices such as stripcropping, terracing, crop rotation, minimum tillage, or a combination of them will reduce soil loss to a permissible allowance.

Services provided by the Soil Conservation District are **FREE** to all who wish to cooperate with the district.

The soil district philosophy has always been one of people working together. We need all of the people working together to overcome the serious problems of soil and water conservation.

SOIL AND WATER DISTRICT BOARD OF SUPERVISORS
